

DATA ANALYSIS

INTRODUCTION

- In Egypt, not all developer jobs pay the same.
- We explored how role, experience, work type, and city affect salaries.
- This helps new developers understand the real tech job market.

PROJECT OVERVIEW

Project Purpose

- Job role (e.g., frontend, backend)
- Experience level
- Work type (remote, hybrid, on-site)
- Location (urban vs. developing cities)

What We Did

- Collected real 2024 salary data from developers in Egypt
- Cleaned and analyzed the data
- Used ANOVA and T-tests to compare groups
- Created graphs to visualize trends
